

bespinian GmbH

At bespinian (<https://bespinian.io>) we love cloud-native and container-based software. Our main goal is to enable your team to develop and operate their software in a modern and efficient way. We therefore work with you on architecting and building your projects and help your team adopt engineering and security best practices.

We feel at home in private, hybrid and public clouds. Indeed, all of our members are expert consultants, competent coaches and seasoned coders. That makes us your ideal partner for creating awesome cloud-native solutions.

Here are some of the standard services we offer. However, we are always happy to innovate and create tailored services with you.

Cloud-Native Engineering

We collaborate with you and your team in the following areas:

- Architecture and Design
- Transformation
- Development (Go, Java, JavaScript/TypeScript, Python)
- Infrastructure as Code
- Automation and CI/CD
- Monitoring and Alerting
- DevOps and Site Reliability

Cloud-Native Training

We conduct classroom based hands-on trainings for the following topics:

- Microservices
- Containers
- Kubernetes
- OpenShift
- Serverless
- Amazon Web Services
- Microsoft Azure
- Google Cloud Platform
- Cloud Foundry

Cloud-Native Security

We help you focus on this crucial topic with the following services:

- Hardening
- Audit
